

DECALPRO[®] fx

MASTER REFERENCE OF ALL "PULSAR" PRODUCTS:

PCB "Fab-In-A-Box"	182-1027-ND
- TTS Transfer Paper	182-1003-ND
- GreenTRF film	182-1021-ND
- WhiteTRF film	182-1022-ND
- PCB (Single Sided)	182-1017-ND
- PCB (Double Sided)	182-1018-ND
DecalPRO[®]	182-1026-ND (Shown Here)
"Combo" (both kits)	182-1028-ND
GBC[®] Laminator	182-1029-ND

This kit gives you the power to make real, professional looking "rub-down" dry-transfer text and graphics using any computer and laser printer.

For the first time in history, you can create your own custom text and graphics in WHITE, METALLIC or even FULL COLOR. Ideal for your "1-up" and prototyping projects.

KIT CONTENTS:

- TTS Transfer Paper 8-1/2" x 11" sheets (20)
- TRF Foil Sampler Foils, 8" wide x 36" (19)
- Carrier Boards Fiberglass, 8"x10" (2)
- CarrierTRF 1/2mil Mylar[®], 8"x15'
- 3M Low-Tack Tape Special #2080 roll of tape
- Alignment Carriers Acetate Sheets (2)
- KK-2000 Alcohol-based adhesive spray
- Alcohol Swabs Cleaning pads
- Practice Images Color and B&W preprints
- Instructions 4-pg "Quick-Start"

ABOUT THIS KIT:

The DecalPRO[®] kit contains everything you need to make dry-transfer graphics except for two hardware items that you might already have or may need to purchase separately. They are a GBC[®] brand laminator and a hot air gun.

The GBC[®] Laminator required for this kit is stocked by DigiKey. This particular laminator is also used with our other kit for making instant printed circuit boards called, PCB "Fab-In-A-Box" kit. (See Hyperlinks above to order this laminator).

We do not include a heat gun in the kit because many customers already have one (and who needs two!) If however, you don't have one, look for the least expensive one at your local Home Depot[®] or Lowe's[®] hardware store. An ordinary hair dryer won't work.

The only other "household" support items you will need are...

Paper Cutter Paper Towel Rubbing Alcohol Bowl of Water

21 Carriage Drive • Crawfordville, FL 32327-2496
