Naturally, the CH20M system also shows its perfection in the peripheral interface.

If you are taking into consideration design options, processing, usability, reliability and security, then pin headers and connectors are just as critical in the real world as the entire system.

In every sector, the connection technology is at the top of its class.

- 100% non-interchangeable the unique, captive "Auto-Set" encoding ensures a misconnection-proof assignment of the connections.
- 100% safe Touch protection for the pin header and socket block on both sides
- 100% efficient All THR pin headers are reflow compatible
